## **Absolut Manufacturing Releases WiPR and SPLiCR**

**November 5, 2024**

**Iron River, Wisconsin** – Absolut Manufacturing, LLC, a Bretting Company, is pleased to announce the launch of the WiPR and SPLiCR for the global nonwovens converting market.

WiPR is our latest in nonwoven cross-folding development. WiPR is a high-speed automatic dry wipe line for production of food service and industrial wipes. Several fixed mechanical folders can be replaced with a single WiPR line making it the perfect solution to reduce labor costs. This line offers an impressive range of cutoff sizes from 24" to 12" (610mm-304mm). The WiPR can be interfaced with multiple packaging solutions for the ultimate in flexibility.

In addition, we are proud to announce the release of SPLiCR to complement our nonwoven product offerings. SPLiCR is an autosplice system designed to perform with our WiPR, Roadrunner and WINDR product lines. Engineered for reliable roll to roll splicing to keep your lines running, SPLiCR reduces start-up and shutdown process waste. SPLiCR has proven to run a wide range of nonwoven substrates and loaded with features, to mention a few:

- Automatic detection and reject of mill splices.
- Automatic lateral register and web guiding
- Safe and easy web thread-up
- Low roll detection

As with all Bretting companies, Absolut is committed to delivering on our promise to provide the gold standard of support and service to the marketplace. Please contact your Bretting/Absolut sales representative to schedule a demonstration or a technical overview to learn why WiPR/SPLiCR is the best choice for you. C. G. Bretting Manufacturing Co., Inc. ("Bretting") is a 134-year-old, fifth generation family-owned business located in Ashland, Wisconsin with 280,000 square feet of manufacturing and office space. Bretting is a world leader in the design, manufacture, and service of paper converting equipment along with contract machining. Absolut Manufacturing, LLC, located in Iron River, Wisconsin, is where we design, manufacture, and service nonwoven and paper bag converting equipment. We recently added a new 30,000 square foot building which includes office, manufacturing, and assembly space. T&T Manufacturing, LLC, in Spooner, Wisconsin, another Bretting Company, provides high-quality machining and fabrication services.
